SEASON 1945

KENWOOD IRIS GARDENS HEMEROCALLIS LIST

(Mrs. J. F. Emigholz)

Sycamore 7496

7595 Montgomery Road

Cincinnati, 27, Ohio

Daylilies are a necessity in every garden. Since labor is high and scarce, we need perennials that give a maximum of bloom, with little trouble. They are invaluable for naturalizing on hillsides, and thrive along banks of water. Their season of bloom in this locality ranges from the middle of May to the middle of August. They will bloom in part shade.

SPECIAL NOTICE: Varieties are placed in color groups. The Betscher hybrids are used as a foundation for numbering varieties as to the depth of color, and other varieties having the same color, were given the same number. Size and form of flowers and height vary greatly, so that two varieties of the same coloring may look entirely different. The numbers help you select different tones of color.

A rich soil, and water in dry weather produces the best flowers. The fleshy roots should be planted 2" deep, spreading them out, and firming the soil about them. They can be re-set locally anytime, but mail orders are sent only in the Spring and Fall.

Several kinds often bloom again in Fall, and are marked "X" before the price.

TRANSPORTATION: Strong single divisions will be sent postpaid. Heavier plants of the cheaper varieties will be given, if shipped express collect. No mail orders accepted under \$1.00. Ohio customers add sales tax.

COLLECTIONS

FOR SUCCESSION OF BLOOM: Cinnabar, Dr. Regel, Middendorffii, Florham, Goldeni, Imperator, J. Crawford, and R. 1 Lemon, listed at \$2.55, for \$1.90.
